

Introduction to Programming and Application Design

Mandatory Assignment # 1

Create a console application using Visual Studio and C# that performs following activity:

The application has following input/output. Please <> mean the inputted value by user.

```
*****Welcome to Gotham's Best Visiting Card Maker*****
```

```
Please provide your details so that we can design your visit card:
```

```
Your Name: <Edward Nygma>
```

```
DOB(dd-MM-yyyy): <29-12-2002>
```

```
Street Address: <Abc Street>
```

```
PostCode: <2000>
```

```
City: <Frederiksberg>
```

```
Your speciality: <The Riddler>
```

```
***** Output *****
```

```
Hello Nygma Here is your visiting card
```

```
-----
```

```
Edward Nygma.
```

```
The Riddler
```

```
Abc Street
```

```
2000 Frederiksberg
```

```
Born: X Days ago
```

```
-----
```

Please note that user is prompted to provide following details:

Name:

DOB: in strict format of (dd-MM-yyyy) i.e. 31-01-2001

Street:

PostCode:

City:

Designation:

Once user has provided details the app presents user well formatted information as shown in the output above.

Note: Showing number of days after calculation from provided Dob can be achieved with the provided hint at the end of this assignment paper 😊.

To do:

- Make a class named **VisitingCardCreator**.
- Make one method with the definition: `public void PrintVisitingCard(string name, DateTime dob, string street, string postcode, string city, string designation) //This methods prints all output in suggested form`

Hints:

- You can convert string to date with your choice of date format with following function
`DateTime.ParseExact(Console.ReadLine(), "dd-MM-yyyy", null);`
for example `DateTime.ParseExact("20-09-2020", "dd-MM-yyyy", null);`
- `DateTime.Now` is a dotnet library property that returns current datetime
- `TimeSpan` function can be used to find Days in following way
`TimeSpan timeSpan = tilDate - fromDate;`
`int totalDays = timeSpan.TotalDays`

Note: Please write the application code and submit on exam portal in pdf format.
